

bksb and **eTracker** work towards outstanding data integration for education providers

bksb and VLE support Ltd (who produce the outstanding eTracker product), can proudly announce that they are working in partnership to develop their respective systems to work together for an even more integrated experience for users.

bksb is the leading product in the UK for delivering and tracking Basic, Key and Functional Skills. eTracker is the leader in the ILP market as a highly regarded and leading edge electronic ILP built on personalisation. With both products working together the handling, tracking and monitoring of QCF (Qualifications Credit Framework) and FL (Foundation Learning) shall become an industry standard and benchmark.

The main aim is that when both systems are operating together, all the elements of the QCF and FL shall appear in the students' eTracker ILP clearly showing their progress in the Basic, Key and Functional Skills against other qualifications, such as BTEC, PSD and vocational subjects, along with Action Plans and Progression Audits, amongst other things.

bksb handles all the specific tracking of the students progress in Basic, Key and Functional Skills, along with resources and testing, and eTracker handles all the other academic and pastoral progress of the students.

On-going development shall see data from some of the other superb bksb products, such as learning styles, ESOL and PLTS assessments, appear within eTracker's ePortfolio system, which works on mobile devices.

To find out more, please don't hesitate to contact bksb on 01623 413333 or by email on enquiries@bksb.co.uk, or eTracker on 0845 638 4328 or by email on info@vlesupport.co.uk. You can also visit the respective websites at www.bksb.co.uk or www.vlesupport.co.uk.
